A RMSE; dotted: delta-method sd
RMSE of α̂
n
B √m × RMSE levels off: √n rate
√m × RMSE
n
C Laplace ML (×, 95% bootstrap bars) and difference estimator (o), same data; dash-dot: known-f bound
√n × RMSE
n
α₀ = 1.3, first differences, stratified design
α₀ = 1.3, second differences, equispaced design
α₀ = 1.3, Laplace ML (100 data sets per n)
α₀ = 1.7, first differences, stratified design
α₀ = 1.7, second differences, equispaced design
α₀ = 1.7, Laplace ML (100 data sets per n)
α₀ = 2.0, first differences, stratified design
α₀ = 2.0, second differences, equispaced design
